SUMMARY

Fresh graduate in Computer Science specializing in Web and Mobile Application Development. Experienced in developing responsive web interfaces and Android application using React.js, .NET Core, Java and React Native. Completed a one-year internship as a Web Developer at Teach For Indonesia, delivering production-ready website features and backend systems that enhanced user experience and streamlined data processing for internal teams. Seeking entry-level opportunities as a Web Developer or Mobile Developer to build scalable and efficient software solutions.

EXPERIENCE

February 2022 - February 2023
Teach For Indonesia (Binus University), Bekasi City
Web Developer Intern

- Designed and developed responsive UI using React.js, enhancing user navigation experience.
- Built backend services with .NET Core (C#) and integrated SQL Server for data management.
- Collaborated with 3 developers to deliver a functional website for internal use within project deadlines.
- Created Figma prototypes and contributed to UX improvements based on feedback.
- Presented and demonstrated the final web application to end-users, showcasing key features and functionality.

EDUCATION

September 2018 - Agustus 2024
Binus University, West Jakarta City
Bachelor of Computer Science (Mobile Application and Technology)

- Aquascaper App - Built Android app using Java and Android Studio as part of final thesis.
- Obstacle Avoiding Robot - Designed Arduino-based robot with ultrasonic sensor (HC-SR04).
- AR Project - Created an Augmented Reality app using Unity and Vuforia SDK.

Education Non Formal:

IBM - Introduction to Agile Development and Scrum (2024)
Meta - Principles of UX/UI Design (2024)
Meta - Version Control (2023)
Udemy - Android App Development with Java (2023)
Meta - Programming with JavaScript (2023)
